Ciara Technologies Announces the launch of the Intel® Xeon™ 3.60 GHz processor with 2MB Level 2 Cache

Innovative technology for dual-processor servers and workstations

Montreal, Canada — February 14, 2005 — Ciara Technologies, a leading provider of high-density rack-mounted computer servers and supercomputer clusters, today announced the launch of the Intel® Xeon™ 3.60 GHz processor with 2MB Level 2 Cache.

Today's businesses rely on their servers to do more and work harder than ever before. Servers built with the Intel® Xeon™ processor offer proven dependability and outstanding performance and represent a wise investment in your Company's ever-expanding technology needs. With innovations such as Hyper-Threading Technology, Intel® Extended Memory 64 Technology, and a large 2MB of Level 2 cache the Intel Xeon processor delivers outstanding performance, headroom, and versatility for front-end applications, small-business servers, and high-performance computing.

About Ciara Technologies:

Ciara Technologies is a world-class computer systems manufacturer. Ciara designs, develops, manufactures, markets, services, and supports a variety of computer systems including graphic workstations, rack-mount and tower servers, networked storage and the newly acclaimed VXRACK™ and VXR-3DT™ Cluster Technology. The company's state of the art supercomputer cluster is based on the Intel IA32 and IA64 architectures and utilizes Linux operating systems. We are proud to be recognized by Intel as an "Intel Premier Provider". Choosing Ciara is choosing a single point of contact for all your IT requirements. All our products are built under the ISO 9001 standards and regulations. The growth of Ciara enabled the company to move its 300+ employees, in February 2003, to an ultra-modern plant of 576,000 square feet. Ciara now has the capability of producing more than 500,000 units per year.
